we don't need any Ds at Berger
& we won't go to FERC if any amendments
were engineered around ~~the~~ that electrical conduit
& won't need any D to SWAPP & BP

Berger site visit

re: conduit thru chiller site

- they didn't account for how ^{groundwater} waters were being conveyed
3 AOCs ^(one may be chiller site) on N. side - contaminants could be
mobilized

DEC did TPH testing only, not other contaminants

last chance to require cleanup

Walter Wang

5-31

we are not going to issue stop work order
the conduit originally had scope of work (SOW) but they engineered solution
I don't know if they reported conduit discovery to FERC
in their biweekly reports
