

DEC HABs Program Archive Summary 2012 – 2016

The letter codes below refer to maximum bloom status that was documented by the DEC HABs Program in each waterbody in each year.

S (Suspicious Bloom): DEC staff determined that conditions fit the description of a cyanobacteria HAB based on visual observations and/or digital photographs

C (Confirmed Bloom): Water sampling results have confirmed the presence of a cyanobacteria HAB which may produce toxins or other harmful compounds

HT (Confirmed with High Toxins Bloom): Water sampling results confirmed that there were toxins present in quantities to potentially cause health effects if people or animals came in contact with the water

Waterbody Name	County	2012	2013	2014	2015	2016
Agawam Lake	Suffolk		HT	HT	HT	HT
